Dear Mr. Lake,

I object to the United States' participation in any agreement that would withhold information from the consumer about the food we eat and the manner in which it is produced. I write specifically about the use of genetic engineering as an experimental technology to produce that food.

I insist upon the consumer's right to know. All genetically engineered food should be labelled as such, including milk produced by BGH technology.

The American public should be given a choice and not have the decision made for us behind closed doors.

Sincerely,

Louis Blois
